

Key Features

- Integrate HistoTrac with your billing system and remove data redundancy and transcription errors.
- Pass data to other laboratory systems for sharing of results.
- Build a custom module for your laboratory specific needs.
- Load legacy data into HistoTrac
- Develop custom reports required by your organization or regulations
- ...and more

Custom Integration is used to integrate existing or legacy software with the HistoTrac software. You will be able to share data between systems without redundant data entry.

We can build custom reports that you or your customer requires.

If you have a legacy application we can populate that data into HistoTrac so that you don't have to rekey it.

Build web access allow your customer or technologist to track results and review patient files.

If you have an idea on how you would like HistoTrac enhanced or integrated we can provide you the resources to accomplish it.

System Requirements

- Microsoft Windows 95+
- Microsoft Access 97+ or SQLServer 7.0+
- 20 MB of disk space
- 32 MB or memory
- VGA (800X600)
