

Key Features

- List supplies by vendor for a quick look-up of all products you use.
- See what shipping and handling policy each vendor uses.
- Track total orders to a vendor to calculate discount levels.
- Receive all supplies and view the amount on hand.
- Subtract amounts as containers/items are used.
- Automatically subtract supplies associated with test orders.
- Use flags when the amount on hand reaches the minimum order level. ...and more

The Supply Inventory Module helps you keep track of every supply your laboratory uses – that's how much and where it's stored, from whom it's ordered. It groups disposable supplies, reagents, general laboratory supplies and office supplies. Vendor information is stored for use when needed to place an order.

Use with the Purchasing Module to create purchase orders, track receipts and payments.

1. Enter vendor information.
2. Establish minimum/maximum levels for all supplies used.
3. Enter supplies on hand, the amount, and the location.
4. Decrement supplies as they are used.
5. Reorder when an email message warns of low supply.
6. Track supply expenditures to your budget.

System Requirements

- Microsoft Windows 95+
- Microsoft Access 97+ or SQLServer 7.0+
- 20 MB of disk space
- 32 MB or memory
- VGA (800X600)
